

ELIEZER PRIETO

Trilingual professional with a solid foundation in exact sciences, computational logic, and interdisciplinary problem-solving. Concurrently pursuing three university degrees in Brazil: Software Engineering (UCDB), Economic Sciences, and Pedagogy (Unifatecie). Previous rigorous background in nuclear physics (InSTEC). Experienced in modular software development, logistical entrepreneurship, and operational leadership.

Location: Campo Grande, Mato Grosso do Sul, Brazil

Availability: On-site & Remote

Languages: Spanish (native), English, Portuguese

Focus: Software, Systems Modeling, Data & Education

PROFESSIONAL PROFILE

I am Eliezer Antonio Prieto Pantoja. My background combines the analytical rigor of Cuba's elite IPVCE Vladimir Ilich Lenin and 3 years of Nuclear Engineering at InSTEC with humanistic studies at the Padre Félix Varela Institute. I am currently pursuing **Software Engineering at UCDB** (Campo Grande, MS) concurrently with **Economic Sciences and Pedagogy at Unifatecie**. Holding official microcertifications in operational cost structuring (CBO 2512-05), corporate accounting, and communication, I bring scientific methodology, algorithmic precision, economic analysis, and clear pedagogical knowledge transfer to solve complex problems.

EDUCATION & CERTIFICATIONS

Software Engineering

In progress

Universidade Católica Dom Bosco (UCDB) · Campo Grande, MS

Software lifecycle, algorithms, data structures, OOP, databases, and systems architecture.

Economic Sciences & Pedagogy

In progress

Centro Universitário Unifatecie · Brazil

Econometrics, operational costs, financial analysis, learning psychology, and instructional design.

Official University Microcertifications

Verifiable

Unifatecie · Fundação Bradesco

Operational Cost Structuring (CBO 2512-05 · 60h), Accounting (10h), Communication (12h), Excel (15h).

InSTEC · Nuclear Engineering

3 years

Higher Institute of Applied Sciences · Cuba

Mathematical physics, thermodynamics, multivariable calculus, and complex systems modeling.

IPVCE Vladimir Ilich Lenin

Graduated

Elite Vocational Institute of Exact Sciences · Cuba

Elite foundations in advanced mathematics, physics, and rigorous analytical thinking.

EXPERIENCE & PROJECTS

Software Development & Architecture

2024 — Present

Academic & Applied Projects · UCDB

Modular software design, algorithmic development, object-oriented programming, databases, and web systems. Systematic use of Git for version control and software engineering methodologies.

Founder & Operational Modeling

Startup

Hasta Tu Puerta · Logistics & Routing

Founded and managed an urban package delivery startup. Implemented algorithmic route optimization yielding a 40% reduction in delivery times, processing 1,200+ shipments debt-free.

Numerical Simulation & Nuclear Physics

InSTEC (3 years)

Mathematical Physics & Complex Systems

Developed 7 technical modeling and simulation projects for physical, mechanical, and hydraulic systems using C++ and Python under rigorous scientific and mathematical standards.

Operational Leadership & Intercultural Coordination

2017 — 2023

Civitatis · GuruWalk (Previous Trajectory)

Coordinated high-end experiences for 3,500+ international travelers across Spanish, English, and Portuguese (4.98/5.0★ rating). Real-time contingency

CORE SKILLS

Software Engineering

Algorithms & Logic

Python

C++

Web & Databases

Git / GitHub

Quantitative Modeling

Economic Analysis

Instructional Design

Operations Management

Spanish · Portuguese · English

Problem Solving
