

SOFTWARE ENGINEERING · ECONOMIC SCIENCES · PEDAGOGY

ELIEZER PRIETO

Trilingual professional with a solid foundation in exact sciences, computational logic, and interdisciplinary problem-solving. Concurrently pursuing three university degrees in Brazil: Software Engineering (UCDB), Economic Sciences, and Pedagogy (Unifatecie), with prior background in nuclear physics (InSTEC). Specialized in modular software development, quantitative modeling, and operational leadership.

Location: Campo Grande, Mato Grosso do Sul, Brazil
Languages: Spanish (native), English (C1), Portuguese (C2)

Availability: On-site & Remote
Focus: Software, Systems Modeling, Data & Education

PROFESSIONAL PROFILE

Interdisciplinary professional focused on solving complex problems through mathematical rigor, software engineering, and economic optimization. Elite background (IPVCE Lenin & 3 years in Nuclear Engineering at InSTEC), with proven ability to model systems, structure operational costs, and transfer technical knowledge with instructional clarity.

EDUCATION & CERTIFICATIONS

Software Engineering In progress

Universidade Católica Dom Bosco (UCDB) · Campo Grande, MS

Software lifecycle, algorithms, data structures, OOP, databases, and systems architecture.

Economic Sciences & Pedagogy In progress

Centro Universitário Unifatecie · Brazil

Econometrics, operational costs, finance, learning psychology, and instructional design.

Official University Microcertifications Verifiable

Unifatecie · Fundação Bradesco

Operational Cost Structuring (CBO 2512-05 · 60h), Accounting (10h), Communication (12h), Excel (15h).

InSTEC · Nuclear Engineering 3 years

Higher Institute of Technologies and Applied Sciences · Cuba

Mathematical physics, thermodynamics, multivariable calculus, and complex systems modeling.

IPVCE Vladimir Ilich Lenin Graduated

Elite Vocational Institute of Exact Sciences · Cuba

Elite foundation in advanced mathematics, physics, and rigorous analytical thinking.

EXPERIENCE & PROJECTS

Software Development & Architecture 2024 — Present

Academic & Applied Projects · UCDB

Modular software design, algorithmic development, OOP, relational databases, and web systems. Systematic use of Git/GitHub for version control and software engineering methodologies.

Founder & Operational Modeling Startup

Hasta Tu Puerta · Logistics & Routing

Founded and directed urban parcel delivery startup. Algorithmic route optimization achieving a 40% reduction in delivery times and 1,200+ shipments processed debt-free.

Numerical Simulation & Nuclear Physics InSTEC (3 years)

Mathematical Physics & Complex Systems

Developed 7 technical modeling and simulation projects for physical, mechanical, and hydraulic systems using C++ and Python under high scientific and mathematical standards.

Operational Leadership & Intercultural Coordination 2017 — 2023

Civitatis · GuruWalk (Previous Trajectory)

Coordinated high-end experiences for 3,500+ international travelers across Spanish, English, and Portuguese (4.98/5.0★ rating). Real-time contingency management and group dynamics.

CORE SKILLS

SOFTWARE & DATA

Software Eng. Algorithms & OOP Python C++ Web & Databases

Git / GitHub

MANAGEMENT & ANALYSIS

Quantitative Modeling Operational Costs Accounting

Logistics Operations Technical Instruction
